

### **Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

### **Listing of Claims**

1. (Currently Amended). A system for controlling playback of digital content on a remote playback device, the system comprising:

a computing platform for storing said digital content for playback by a remote playback device;

a digital content player application, resident on said computing platform for enabling playback of said digital content on said remote playback device; and

a remote control device which includes a communication system for communicating with said computing platform over a ~~predetermined~~ first communication link and identifying stored digital content on said remote computing platform, said computing platform being remote from said remote control device, said remote control device further including a display for displaying a list of stored digital content available on said remote computing platform, said remote control device further including a input device to enable digital content to be selected from said list of stored digital content and a control system for displaying said list of stored digital content and causing the selected digital content to be played on said remote playback device ; and

a playback device coupled to said computing platform by way of a second communication link for playback of stored digital content on said computing platform selected by said remote control device.

2. (Previously Presented). The system as recited in claim 1, further including a transmitter for transmitting from said computing platform to a remote analog playback device.

3. (Original). The system as recited in claim 1, wherein said digital content is digital audio data.

4. (Original). The system as recited in claim 1, wherein said digital data content is digital video data.
5. (Original). The system as recited in claim 1, wherein said computing platform includes a local storage device for locally storing digital content.
6. (Original). The system as recited in claim 1, wherein said computing platform is configured to receive said digital content over a network.
7. (Original). The system as recited in claim 6, wherein said network is the Internet.
8. (Original). The system as recited in claim 1, wherein said remote control device includes user inputs as well as user outputs.
9. (Original). The system as recited in claim 5, wherein said local storage device includes a persistent storage device.
10. (Original). The system as recited in claim 5, wherein said local storage device includes a removable storage device.
11. (Original). The system as recited in claim 1, wherein said predetermined communication link is a wireless link.
12. (Original). The system as recited in claim 11, wherein said wireless link is an RF link.
13. (Original). The system as recited in claim 11, wherein said wireless link is an infrared link.
